

Problemi di spazio?

Il "NUOVO EASY WC" è l'apparecchio che unisce le funzioni del wc con quelle del bidet in un'unica soluzione!

All'apparenza il prodotto si presenta come un normalissimo copriwater, ma in realtà cela al suo interno un pratico erogatore, dall'accattivante design, a scomparsa totale, che garantisce al prodotto la duplice funzione wc / bidet, senza trascurare l'estetica del water che rimane sostanzialmente invariata.

Per azionarlo basta alzare la tavoletta, far uscire l'aeratore dalla sua sede mediante meccanismo a ribalta ed infine azionare il miscelatore che è in grado di fornire acqua calda o fredda a seconda delle esigenze.

Caratteristiche e vantaggi:

- Sistema integrato delle funzioni di un normale wc con quelle di un bidet.
- Possibilità di potere usufruire di acqua pulita per la propria igiene personale.
- Autonomia da qualsiasi fonte di alimentazione elettrica esterna (il "NUOVO EASY WC" infatti non possiede alcuna spina di corrente, spia o scomodo pulsante in quanto funziona mediante forza idraulica erogata da un classico rubinetto miscelatore).
- Design, produzione e materiali MADE IN ITALY.
- BREVETTO EUROPEO che garantisce la totale certificazione sull'efficienza e sulla qualità del prodotto rispetto agli standard UE.
- Recupero di spazio all'interno del bagno (in media la rimozione del bidet garantisce un guadagno di spazio pari ad 1,00 m, misura ideale per l'installazione di un mobiletto a colonna, di un mobile lavabo più ampio o quant'altro).

- The combination of normal toilet functions with the hygienic and refreshing actions of a bidet in one integrated and discrete system, guaranteeing personal cleanliness and assurance with comfort and ease.
- The possibility to enjoy the benefits of clean water for your personal hygiene wherever you are, without the need to use another bathroom fitting, additional support bars or uncomfortable spray heads.
- Complete autonomy from any external electrical power source (the "NUOVO EASY WC" does not use a power plug, light or inconvenient switch, as it functions using hydraulic power supplied by a classic mixer tap).
- A strictly MADE IN ITALY design, guaranteeing a captivating and popular product line, which doesn't upset the appearance of bathrooms (when closed it looks like a normal toilet).
- Materials used for product manufacturing used are also strictly MADE IN ITALY.
- EUROPEAN PATENT guaranteeing total certification of product efficiency and quality with respect to EU standards.
- The intelligent utilisation of space within the bathroom (on average, removal of the bidet guarantees additional space equal to approximately 1 metre, the ideal space for the installation of a bathroom cupboard, larger bathroom vanity and so forth).
- The possibility to enjoy a complete bathroom even when the available space wouldn't ordinarily allow it.
