PORCELAIN TILES

ATTENTION
Please verify that the tile grade, shade and calibration numbers match on all boxes prior to installation. Visually inspect tile prior to installation. Shade variations are inherent with ceramic tiles. Mix tiles from several boxes during installation to achieve a proper shade distribution.
Rotate tiles to ensure a random box. No returns or any other claims will be accepted after installation.

LAVAROCK

WARNING
1. Before application, the surface must be settled and cleaned carefully. 2. The tile surface must be protected from heat, frost and abrasive materials. 3. Do not add lime to the mortar. Special tile adhesives recommended. 4. The thickness of the joints should be at least 3mm. The joints must remain for 24 hours before filling. 5. If you have any problems, please get in contact with your dealer by quoting the production date and control code
