*Ceramiche San Nicola*

## UNA STORIA DI ESPERIENZA, INNOVAZIONE E QUALITÀ.

**L**a Ceramiche San Nicola s.r.l. nasce nel 2004 da imprenditori che fin dal 1970 hanno maturato una notevole esperienza nella realizzazione di pavimenti e rivestimenti in gres porcellanato e si è subito affermata come il maggior polo produttivo del settore nel Mezzogiorno di Italia. Dopo un radicale rinnovamento di impianti e personale, l'azienda, a soli dodici anni dalla sua nascita, è già all'avanguardia nelle tecnologie di produzione ed è in grado di realizzare una linea di prodotti completamente nuovi. Il nuovo impianto completamente digitalizzato ha consentito di diversificare notevolmente la produzione e di realizzare pavimenti e rivestimenti di qualità che riproducono in modo fedele elementi naturali come il legno, il marmo e la pietra.

## A STORY OF EXPERIENCE, INNOVATION AND QUALITY.

**C**eramiche San Nicola was founded in 2004 by Entrepreneurs who had acquired considerable experience in producing ceramic floors and coverings since 1970, and soon established itself as the biggest and most important Manufacturer in South Italy. After a radical renovation of production line and staff, the Company, just 12 years after its birth, has already reached a forefront position on the market thanks to its cutting edge technology. The completely digital new production plant has enabled us to considerably diversify production and manufacture high quality tiles that faithfully reproduce natural elements like wood marble and stone.

## FORMATI RETTANGOLARI RECTANGULAR SIZES

### CONSIGLI PER LA POSA IN OPERA

I pavimenti in gres porcellanato (materiale ad alta resistenza) comportano **leggere differenze di tonalità e calibro** che **non danno motivo di contestazione a posa effettuata**. E' quindi consigliabile verificare il materiale a secco prima della posa in opera. Le tonalità dei campioni sono sempre indicative. Per la posa in opera è consigliata una **fuga di almeno 5 mm**, con l'utilizzo delle normali crocette distanziatrici.

### WARNING

Porcelain stoneware (high resistant material) can be subject to differences of colour shades that cannot be object of dispute after laying. **Therefore it is advisable to check the materials before laying**. The colour shades of the final products might slightly differ from the samples. For laying the tiles it is recommended **to keep at least 5 mm, between the tiles** using normal spaces.
